

Pranav Varshney

Internship - IT Software Engineer | COMPANY, Summer 2024

Dear Hiring Team,

In my pursuit for real world software engineering experience through an internship program, I was excited to find COMPANY's internship position. I am writing to express my interest in the Software Engineering Intern position at COMPANY.

I am a computer science student at the University of Michigan in Ann-Arbor. I have honed my skills in software engineering through courses in Data Structures, Python in Sciences and Web Design. My highlight is developing an online news parser that keeps me updated on local and international news. I was able to learn critical software skills, working with Node, React, postgresSQL, RESTful API and many more industry valuable tools. I am going to take Algorithms, Computer Theory and Computer Organization with Michigan, while working towards specializations in postgresSQL and Artificial Intelligence / Machine Learning.

As a software engineer intern, I had the opportunity to collaborate with experienced programmers in driving the full-stack development of a vehicle rental web application. I was pushed into the deep side of project management and web development, learning the essentials of the workforce. Further, working in consulting, I have learned the importance of customer service and satisfaction, a mission that aligns with COMPANY.

COMPANY is at the forefront of DESCRIPTION. COMPANY is known for its friendly and collaborative work culture, which promotes teamwork and encourages personal growth. I believe that such an environment will enable me to thrive and contribute effectively to the company's mission. I would like to be a part of COMPANY's journey to improving the much needed agricultural innovation this world needs, and enhance my skills and knowledge along the way.

Thank you for reviewing my application. I am available for an interview at your convenience and would be happy to provide any additional required document. I appreciate your time and consideration.

Sincerely,

Pranav Varshney
